OBJECTIVE

Engineering student with foundational knowledge of Backend Development, Cloud concepts . Skilled in Java, Spring Boot, APIs, and SQL, with internship experience on a Charging Management System developing backend logic, API integration, and database operations. Familiar with cloud fundamentals including compute, storage, networking. Quick learner with strong problem-solving abilities, documentation skills, and a keen interest in enterprise IT operations and cloud support.

EDUCATION

Bachelor of Electrical Engineering , Government College of Engineering Kalahandi (CGPA: 8.23)	2022 - 2026
Higher Secondary Education , Rajendra University , Balangir, (Percentage: 71.66)	2020 - 2022
Secondary Education , Viswatma Vidya Mandir , Balangir, (Percentage: 66.66)	2019 - 2020

SKILLS

Frontend:	React, HTML, CSS, JavaScript,	Databases:	SQL (PostgreSQL, MySQL)
Backend:	Java, Python, Spring Boot, APIs	Deployment:	Netlify, Render, Vercel
Version Control:	Git, GitHub	DevOps:	Docker

INTERNSHIP

SDE Intern HireKarma (hirekarma.in)	April 2026 – Present <i>Bhubaneswar</i>
--	--

SDE Intern at Hirekarma Pvt. Ltd. working on full-stack development using **Python, Next.js, TypeScript, Tailwind CSS, and PostgreSQL**. Contributing to scalable web applications and RESTful APIs, focusing on performance, clean architecture, and real-world product features.

- Lakshya Platform: lakshya.hirekarma.in
- Disha Platform: disha.hirekarma.in

Backend Development Future Motion Pvt Ltd (@Karocharge)(karocharge.com)	Dec 2025 – Present <i>New Delhi (Remote)</i>
--	---

- Developed backend systems for EV charging infrastructure using **Spring Boot**, enabling communication with multiple Charging Management Systems (CMS) to control real and virtual chargers. Worked with **SQL**, RESTful APIs, and gained experience in **API testing, system monitoring**, and scalable backend design.

PROJECTS

Fitness Tracker Application (GitHub Repo)	Feb 2026
--	----------

- Designed and built a full-stack fitness tracking system using **Java, Spring Boot**, and **Microservices architecture** with **React** frontend. Implemented service discovery using Eureka, asynchronous communication with **RabbitMQ**, and containerized services using **Docker**. Integrated **MongoDB** and **PostgreSQL** for data management, secured APIs with **Keycloak** authentication, and added **AI-based** insights using **Gemini API**.

Job Scraper Platform (GitHub Repo) (Live Link)	Jan 2026
---	----------

- Built an **AI-powered full-stack job scraping platform** that aggregates listings from multiple job portals into a unified dashboard. Implemented keyword/location-based scraping, **JWT authentication**, application tracking, and an **AI resume parser** for skill extraction using **Python (FastAPI)**, **React**, **TypeScript**, **TailwindCSS**, and **PostgreSQL**, deployed on **Netlify** and **Render**.
